

# Shuffleboard

Shuffleboard is an exciting game that is played by people of all ages for fun, healthy outdoor and indoor exercise, and calls upon players to develop hand/eye coordination plus strategy and a competitive spirit.

## *The Playing Court*

The court is 6 feet wide by 52 feet long with a 6 foot - 6 inch standing area at each end. Normal construction material for a shuffleboard court is re-inforced concrete, but can be played on any reasonably flat surface by painting lines, or using portable courts that are available.

## *The Game*

The game of shuffleboard is played by either 2 people (singles) or by 4 people (doubles). The object of the game is to propel discs by means of the cue onto a scoring diagram on the opposite end of the court. When propelling the discs, players may try to score, prevent their opponent from scoring, or both.

To begin play, the yellow (or red) disc is always shot with the cue first. Play alternates ~ yellow/red, then black ~ until all discs are shot. Games may be played to 50, 75 or 100 points and match play shall be on the basis of best 2 out of 3 games.

## *Scoring*

Scoring diagram ~ one 10 point area; two 8 point areas; two 7 point areas; one 10-off area.

After players have shot all of their 4 discs, score all discs on diagram.

## *Penalties*

There are several ways to accumulate penalty points. The following is an explanation of just a few:

Disc touches front or back line ~ 5 off

Disc touches side or middle lines ~ 10 off

Players may not leave court without permission ~ 10 off

Players shooting before opponent's disc comes to rest ~ 10 off

Players may not touch live discs at any time ~ 10 off
